ICNU Data Request 3.30

### **ICNU Data Request 3.30**

Please provide a list of all contracts included in ICNU 1.21 which self supply reserves and/or which do not have any ancillary service reserve revenues reflected in the current test year. Please provide copies of these contracts and indicate why there is no charge for the reserve services being provided.

### **Response to ICNU Data Request 3.30**

There are two contracts included in ICNU 1.21 which self supply reserves and/or which do not have ancillary service reserve revenues reflected in the current test year: "Pelton Rereg Gen" and "West Kraft Misc Gen" (Weyerhaeuser Company). Copies of the contracts are provided as Attachment ICNU 3.30 -1 and Confidential Attachment ICNU 3.30 -2. This information is confidential and is provided subject to the terms and conditions of the protective order in this proceeding.

The Pelton Rereg Gen contract was a unique arrangement that upgraded some existing PacifiCorp transmission facilities and connected the Warm Springs Tribal generator to the Portland General Electric ("PGE") substation. This enabled the Tribe to sell capacity to PGE. The contract charges the tribe a use of facilities charge for the transmission facilities. The contract does not include any provisions governing charges for reserves provided within PacifiCorp's balancing authority area.

Weyerhaeuser has an agreement with the Company that allows them to self supply their own internal requirements for reserves.
