Stephen K. Langer

RECEIVED

Dear Commissioners of the PSC:

It really pains me that I must waste my time because Rocky Mountain Power, as it wishes to be call, wishes another rate hike. When granted, as I know you pro-utility commissioners will give the greedy utility it's wish, I will be "FORCE" to contact the power company and have the power turn off.

This is because the power company will contunie to raise its rates to make huge profits for itself and the expense of the comsumers. The so called PSC does not protect comsumers. It is more supportive to the greed of the utilities.

This is one reason why I wish to change the name from Public Servic Commission to Utility Service Commission. The commission's pro-utility policies proves the new name is more logical.

To begin with, I oppose the rate hikes because I will not be able to pay the electric bills when you grant the rate hike. I will have no other recourse, but to have the power turn off. I will have no lights, use of the refrigerator, heat, ability to cook meals, and meet other needs that requires the use of electricy. Your pro-utility attitude is denying me the use of power to get by, every day. It's solely because you're more interested in giving the power company what it wants. I suggest you people try living on a fixed income.

You will tell me there is support in paying the utility bills, but it does exist. I cannot deal with outrageous red tape in getting kind of help. I tried, in 2000, but the parties, which are control by the State of Utah, did not care if I did freeze. I decided to give up as I was hurt because I live on a fixed income. So, there is no such thing as any kind of relief program in the State of Utah. That, I blame on the self center Republican Party and it's special interests friends, which includes the so called PSC.

Another reason, why I oppose any more rate hikes, there has been far to many power outages, all power company's inducing The service is horrendous as it is. The company does not care about its custom-ers. I cannot do any business with this power company. I have beg the so called PSC to find me another power company. I amn tire of dealing with Roicky Mountain Power. I wnt them out of my life. I am tire of dealing with people who do not care. They

always lie to me and give me the run about.

Another reason I oppose any more rate hikes, is that their so called call center is location about 900 miles from Salt Lake City. Portland, Oregon, is to damn far. The service repersentives have no clue what goes on, in Utah. At least Questar, despite how much I hate dealing with them, have local call centers Rocky Mountain Power should do the same. This way, Utahns handles Utah's problems, not someone who works in another part of the country. When will that problem be correct? Probably never.

As far I am concern, there is no reasons to give the power company another rate hike. Infact, why don't you let the rate payers vote on the proposal. This country is suppose to be a democracy and it involves my money. I should have the right to vote no on any future rate hikes as I refused to be rip off for crappy service and affordability. When will the customer have a voice in these matters? I guess the so called PSC rather run things like a dictatorship and contunie to shove these damn rate hikes down our throats

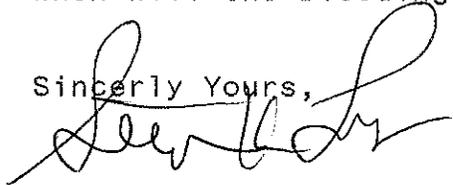

The power company is making huge profits. The power company wants people, like me, to pay outrageous rates so its stock holders can afford buying yachts and what ever. This is not far, but you people don't care if I have to have the power turn off. You don't care if I am force to do without. You're far more interested in assisting a crappy power company that is strongly anti-comsumer. I hope you rich Republicans enjoy keeping cool, or warm, while those who cannot afford these contunieing rate hikes are force to do without.

Thanks to you three, by August, or sooner, when you hand the power company it's ouyrageous rate hike, I will have to have the power turn off. Because I live on \$1,059 a month, I am force to slash what I cannot afford. That is why I hate the PSC and it has done absolutely nothing to help me when I have complaints. As I said, I have begged the PSC to find me another power company that will not rip me off and is more comsumer friendly.

I just cannot take it anymore. I know the PSC is to chicken to tell Rocky Mountain Power no on any rate hikes. You people do not have the guts to say no so Utah comsumers are not force to pay high rates for lousy service.

When will the bleeding stop? Never.

Sincerly Yours,

Stephen K. Langer
