CCS Data Request 16.63

CCS Data Request 16.63

Have the designations or names of any of the wind turbine generators on the CH2MHill consultants project maps for the Glenrock, Rolling Hills, or Glenrock III project been changed to reflect the final electrical connections of the projects, as compared to earlier designations used by the Company. If so, please identify each such instance where a turbine previously classified as being part of Glenrock changed to being classified as part of Rolling Hills, or Glenrock III. Please do the same for Rolling Hills or Glenrock III turbines whose naming classification has been changed.

Response to CCS Data Request 16.63

The Company objects to this question on the basis it is vague. Notwithstanding this objection, the Company states that wind projects in this docket under construction (Glenrock III, Rolling Hills and Seven Mile Hill II) have layouts that are subject to construction-related adjustments. The layouts associated with the final build design estimate for the Glenrock III and Rolling Hills wind projects is respectively included in the confidential Final Build Design Estimate reports attached as Confidential Attachments CCS 16.63 -1 to CCS 16.63 -3. This confidential information is provided subject to the terms and conditions of the protective order in this proceeding.

A description of turbine locations contained in the final build design estimates for Glenrock, Rolling Hills and Glenrock III follows:

- **Glenrock** – 12 turbine locations were previously included in the Glenrock III project layout and 1 turbine location was previously included in the Rolling Hills project layout.
- **Rolling Hills** – 14 turbine locations were previously included in the Glenrock III project layout.
- **Glenrock III** – 13 turbine locations were previously included in the Glenrock project layout 13 turbine locations were previously included in the Rolling Hills project layout.
