Subject: Pacificorp's \$16,000,000 rate increase request

Mr. Livingston,

Kindly consider denying Pacificorp's \$16,000,000 rate increase request. They have received rate payer funded revenue increases amounting to about \$343,000,000 in the last 9 years.

In return, they have moved their engineering support office largely out of Utah. Also, they have reduced their inventory of replacement equipment. They are managing local projects from Washington. Hence, their timely and effective support to Utah customers to replace equipment is waning. With the money they claimed to be saving with more centralized control, we should be getting a rate cut.

Kindly deny their current rate increase adjustment.

Robert Garn
