Subject: Fwd: Questar's attempt to scam the public

>>> "Dirk Willden" 10/22/2008 5:25 PM >>>
Ladies and Gentlemen who are supposed to be watching out for the peoples interest.

In no way or form should Questar be allowed to pass the cost of their mistakes onto the public. They have a monopoly already, if their business practices and financial/operational audit systems were faulty enough to let the underbilling occur for two years. Then let the costs come out of their balance sheets, they can cut the Executive Bonuses, or they can write it off as a loss. They cannot be allowed to pass the cost of their bungling on to the consumers who have no other options for heating their homes.

I am not the most eloquent writer so I hope this email makes sense. DENY Questar's PLAN. Make them absorb the lost with NO RATE INCREASES.

Thank you for your time.

Dirk Willden

A Questar customer.
Currently deployed with the UTARNG.
I'm too lazy to come up with a creative sig!
