Subject: Docket # 08-057-11

I saw on the news a couple nights ago this issue with Questar Gas and it's customers regarding the transponders. This should not even be an issue. These people used that gas, therefor they pay for it. What the hell is wrong with us in this country? No one has any honor or integrity anymore. Why is this even being debated? If you consume something, you pay for it. 2 months ago I received a bill from Questar for \$1,400 more than normal. When I inquired as to why, the reason was the transponder was faulty. That is the only explanation I needed. I paid the bill in full. To do anything else would be dishonest. I will gladly provide you with copies of the bill or any other proof you may like. I did not try to get 75% of the bill dumped on Questar and it's other customers - and neither should these people.

Thanks, Jeanine Humphrey
