Utah Public Service Commission

2008 NOV 12 A 7 01

158413

Reference: Questar under billing case

RECEIVED

The possibility that the commission is going to agree with Questar and assess any rate payers for the Questar mistake is outrageous and I expect will lead to a long and tedious law suit that will only cause more heartache and credibility loss for the gas company, the commission, the state legislature and the governor.

Questar is required by law to have strict governance policies reviewed quarterly and semi-annually on rate issues, personnel policies, tax policies etc. Questar was honored as one of the best managed corporations in the Western States. How can this be?

The credibility of the commission, and all state agencies involved are at stake in the extraordinary decision.

Let right be done.

Sincerely,

  
Russ Fjeldsted
