RE: "DOCKET NO. 07-057-13 – In the Matter of the Application of Questar Gas Company to Increase Distribution Non-Gas Rates and Charges to Make Tariff Modifications. As Filed by the Commission on December 22, 2008

RECEIVED

Dear PSC,

I am writing because I oppose the natural gas increase that ties Utah's natural gas prices to the national average. I feel that this decision is based on motives that are unknown to the public. I believe we should keep natural gas prices low and based on local factors such as Wexpro.

I have sold my previous economy car and bought an SUV that depends on natural gas. I would have never bought such a big vehicle, but at the time there weren't many options of natural gas vehicles to choose from. I made this decision because our natural gas is local and has been priced lower than regular gas for many years. I can't afford to drive an SUV on regular gas and would have never made this decision if I knew the price of natural gas would dramatically increase.

Please help support Utah's natural gas vehicles by keeping natural gas prices low and making decisions that benefit the public.

Sincerely,

Veronica Chapman
