Subject: NGV Ruling 07-057-13

Dear Mr Livingston,

I dont know if you'll even read this, but thought that I would write and tell you how dissappointed in this ruling. I have had 4 vehicles converted, and had them converted for a number of reasons. 1. natural gas burns cleaner than ethanol and regular unleaded which is clean for our enviroment. 2. I did it for the cost of the Natural gas .63 per gallon would off set the cost of the installation of the equipment. 3. I thought that I would help start a trend that would lead to Clean air and also wean us for foreign oil!

This ruling has put us back so far! anyone that was in business selling or installing CNG kits will go out of Business. Warrany's will be out the door.

The reasons I listed above help offset the cost and with this bill you are killing NGV's, CNG's from entering our market. People paid alot of money for these vehicles and now there value has plummeted by up to 40%. I am so suprised that you can pass a bill to go against what everyone in this country is trying to suceed in by getting off of Foreign Oil. It is already a pain to find these Natural Gas pumps, you are putting the nail in the coffin! lets just keep on buying foreign oil, and who cares about the air that we all breath? not you unless you overturn this bill.
