

UTAH PUBLIC  
SERVICE COMMISSION

- **We supported our Governor** and bought CNG cars – at no small expense to us. We encourage all Utah Drivers to follow his lead.
- **We feel good about our choice** to do this to help promote 90% cleaner air –
- **We believe everything should be done to encourage CNG vehicles – not discourage them.**
- **WE FEEL PATRIOTIC WHEN WE ARE USING NATURAL GAS FROM OUR OWN STATE – AND WE DON'T HAVE TO BUY GAS FROM FOREIGN COUNTRIES.**
- We are good citizens. We do not understand what Mr. Roger Ball and his friends are saying. However we do want to know and to understand.
- We had no idea there was being held a Public Hearing to hear their points and we know not one CNG driver who was informed or invited to such a Hearing.
- **We respectfully ask that a Moratorium be issued at once, restricting any decisions made as a result of that Public Hearing - until an equitable Committee can be appointed to consider all concerns regarding the use of CNG vehicles and natural gas; then conducting a fair Public Hearing where the public may speak, issues are aired, and points defined before decisions are made.**

**Thank you for working quickly toward this request.**

Dennis Flynn, friends and family –
