RECEIVED

Dear Person:

Cng was a wonderful chance to have clean air and with little I could help by driving a clean air car. Being 79 and on pension I scrimped and saved and got a loan for the rest of the \$ 7,100.00 installation cost (at my age no refund from the gov or state) WITH THE PRICE OF CNG here in Utah I hoped to have a clean air car and pay for it before I die.

My son and I took a trip back east, cng \$ 2.41 gal at that time in Arlington.

The stations in Cal is a monopoly company for price not because of the actual cost from the well of cng.

If the price is raised here with cheap cng wells, I will never have my installation cost returned from buying cng to run a clean air car for my fellow citizens

Phil Herbert
