Subject: CNG for autos increase

To:
UTAH PUBLIC SERVICE COMMISSION

RE: Docket No. 07-057-13

We just wanted to write to let you know how unhappy we are with the decision to raise natural gas prices for automobiles without using the Wexpro fuel resource benefit . We use natural gas to heat our home as well as fuel our dedicated NGV car (Honda Civic GX) so we have no choice but to buy from Questar Gas. We wish to keep the benefit or lower natural gas prices using the Wexpro resource.

We have no problem with adding in some cost to increase the number of CNG stations or upgrade the existing CNG stations here in Utah however, we would like to keep the benefit of the lower gas costs for our home as well as our CNG automobile.

We would like to request another hearing to allow us to express our concerns in person.

Please notify us of the rehearing date in advance so that we may arrange our schedules to attend.

Thank you for your kind help in this matter.

Mike and Kathleen Imbler
