SUBJECT:

I am frustrated with the CNG rate hike that passed PSC vote just before the holidays.

Nevermind the apparent trickery with the timing but, the ruling cites some rather weak reasoning as to why the CNG fuel increase is valid.

I would like to remind you that Utah and SLC in particular have very poor air quality. CNG can help resolve some of those problems while local production can help strengthen the local economy keeping our state aloof from national troubles during rough times.

In short I would like to see a stop put on the PSC movement and the Respective bill redressed with some real logic behind it
