**SUBJECT:**

I heard from a friend of mine that the Utility's commission gave Questar the approval to raise the fuel Price of CNG ( compressed Natural Gas ) to the national Average !

Wow I spent a lot of hard earned money to convert to CNG, so that I could afford to use my work truck in my Business, plus to be able to afford a little traveling now and then in my personal car, what was the point, if Questar is going to raise the price to the US Average,

I should have just stuck to Gasoline if thats the case.

And I have thought of having a home pump system installed, but some how I know Questar will figure out how to raise the price on that too, Plus the cost of a home pump system is just to much.

Give us Utah'n a Break, here we are trying to go green, plus save our selves a little hard earned Cash, and what happens, the Utility commission, allows Questar to get a big raise and hurt the little guy in the pocket book again.

Please stop this from happening !

Thank you Gene T. Snow

PS Congradulations on making it another term, keep up the good work!
