RECEIVED

SERVICE ADDRESS:

UTILITY: CNG  
ACCOUNT NUMBER: Vehicle CNG

COMPLAINT TYPE: Rate And Tariff

COMPLAINT: Recently an increase in the price of CNG has been declared. As I understand it, this is in lieu of a decrease in home natural gas prices. There is no push to get more people to use natural gas in the home, but there certainly is a push to get cleaner vehicles for the purpose of a smaller carbon footprint. All organizations, including you and other governmental agencies, should be providing greater incentives for switching to cleaner modes of transportation. Any increase in CNG prices that leads people to go back to their gasoline vehicles is a step backwards in our line of progression as an environmentally-conscious society. Many have swarmed en masse to purchase CNG vehicles as of late, and an increase in the prices of the CNG fuel will cause cleaner vehicle usage to decrease, making it unprofitable for companies to work towards a cleaner environment. Like I said...a step back.

SUGGESTED RESOLUTION: I suggest overturning the decision to raise CNG fuel costs for the purpose of encouraging those financially who would seek to drive cleaner vehicles. Thanks for your time.
