Mr. Logan,

RECEIVED

I spoke with someone in your office today about the recent ruling by the commission to raise the price of natural gas for those of us who drive natural gas vehicles. I asked about how we, as the public, were made aware of the pending decision by the board. She informed me that it was in the local newspapers, posted on your website, and hung on the walls around your office. I would like to be provided with the dates of the postings, locations of the postings and information that was included in the postings. I have contacted the local papers and they can not produce this information. This whole scenario is suspicious and questionable. You guys ought to be ashamed of yourselves!

Please send me the information requested as soon as possible.

Thank you,

Erik Zenger
