Subject: New Area Code Overlay

CC:

I think it is time to replace any and all PSC staff members who had a hand in and approved this monster called the area code overlay. What a bunch of morons. The State went through the 435 area code by geographic boundaries and the business survived having to print new letter head and business cards. The new area code should have been handled the same way instead of doing it by an overlay.

I am contacting all state lawmakers asking them to approve HB 215.
